

SUMMARY

Software Engineer with 3+ years of experience in Python, FastAPI, React, SQL, and REST APIs. Built scalable applications and enterprise payment systems handling 10K+ daily transactions, with expertise in API development, automation, and performance optimization.

WORK EXPERIENCE

System Engineer, Tata Consultancy Services

Aug 2023 - Present

- Developed policy premium payment workflows for HDFC Life, processing 10,000+ transactions daily with policy validation, payment verification, reconciliation, and receipt generation.
- Delivered **12+ insurance business requirements**, including WhatsApp payments, new payment modes, Loan Against Payment, JWT authentication, rate limiting, and policy validations.
- Automated **3 daily transaction reports** and a daily **failed-posting retry batch**, saving 2–3 hours daily while optimizing SQL queries and payment processing performance.

PROJECTS

Wiseweb-AI

[Demo](#)

Tech Stack: Python, FastAPI, PostgreSQL, React, TypeScript, Vite

- Developed WiseWeb-AI, an AI-powered website intelligence platform that crawls and analyzes websites across 8 categories including SEO, security, architecture, UX, and content issues.
- Implemented automated website health scoring and AI recommendations, enabling users to identify critical issues, prioritize improvements, and generate detailed analysis reports.

Spentrax

[Live](#)

Tech Stack: Python, FastAPI, SQLAlchemy, SQLite, React, Chart.js, JWT Auth

- Built Spentrax, a full-stack expense management application with expense tracking, monthly budgets, recurring-expense detection, CSV import/export, and financial analytics.
- Integrated AI-powered financial insights with rule-based fallback, supporting 14+ API endpoints, 11 default categories, and 82 automated tests.

Driver drowsiness detection system

[Live](#)

Tech Stack: Python, FastAPI, MediaPipe, OpenCV, WebSockets, React, Vite

- Implemented a real-time system to detect driver drowsiness using computer vision with facial landmarks, Eye Aspect Ratio and Mouth Aspect Ratio achieving 95.20% detection accuracy.
- Presented a research paper titled “**Automated Driver Drowsiness Detection System**” at the ICSCDS 2023, IEEE-sponsored event.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Aug 2019 - May 2023

Prasad V. Potluri Siddhartha Institute Of Technology - CGPA : 8.38

TECHNICAL SKILLS

Programming languages	: Python, Java, JavaScript, TypeScript, SQL
Frontend	: React.js, Next.js, Tailwind CSS
Backend	: FastAPI, Django, Node.js, REST APIs, JWT, Microservices
Databases & Tools	: PostgreSQL, MySQL, SQLite, Redis, Git, AWS, Docker, Postman
Technologies & Concepts	: System Design, AI/ML, Computer Vision, Data Visualization
